Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 8-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over either Dufour (2424226) or Jankauskas (3747238) in view of Kastner (5643283).

Dufour or Jankauskas shows a shoe sole formed from resilient materials (28 or 14) with studs (30 and 31 or 20) embedded therein with a recess (shown in figures 8-10 or figures 1, 3, and 5) substantially as claimed except for having the tips of the studs extending beyond the bottom surface of the sole. Kastner teaches extending a tip portion of a stud beyond the bottom surface of the sole. It would have been obvious to extend the tips as taught by Kastner in the shoe of either Dufour or Jankauskas to increase traction on softer surfaces.

Allowable Subject Matter

3. Claims 1-7 and 12 are allowed.

Response to Arguments

4. Applicant's arguments filed 1/13/05 have been fully considered but they are not persuasive.

In response to applicants' arguments directed towards Dufour or Jankauskas, there is no requirement in claims 8-11 for a more resilient inner layer, the claim only requires that the "sole having a bottom work contacting surface and an upper surface and being

formed from a resilient material of substantial thickness located between said surfaces". There is no requirement for two materials much less any relation of different resiliencies as argued.

In response to applicants' arguments directed towards the function of the manner in which the studs retract, it appears that tip portions would retract as claimed especially since all of the positively claimed structures are present in the references.

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
